Html | CSS | Bootstrap | JavaScript | Es6 | TypeScript | Angular | React.js | redux | Unit Test & Debugging

Version control:

Agile methodologies |Git & GitHub

Soft-Skills:

Adaptability and Flexibility | Problem Solver | Quick Learner | project management skills

EDUCATION

Bachelor of Arts: Islamic History

Faculty of Arts - Alexandria University | June 2019

Internship

Intensive Training Program (ITP) - (ITI) 🔗 **| 11/2023 – 07/2024**
ASP.NET Full stack Web Development Track Information Technology Institute (ITI)

CERTIFICATES

New Horizons 🔗
React.js Front End Web Development Diploma (Front End Developer)

Route 🔗
Full Stack Web Development Diploma

WORK EXPERIENCE

Rental House Website 🔗
Rental website built with ASP.NET Core 8 for the backend and Angular for the frontend. Rental is an innovative platform that aims to transform the way tourists rent houses, villas, apartments, and camps touristic places through Restful APIs.
- Implementation of a 3-tier architecture.
- Usage of Entity Framework Core as the database technology.
- Utilization of mapping mechanisms such as Table-Per-Hierarchy (TPH) for efficient data management.
- Integration of Identity and JWT (JSON Web Tokens) for authentication and authorization.
- Incorporation of dependency injection.
- Leveraging design patterns to ensure modularity and maintainability in the codebase

ASP.NET Core CRUD Student Manager
- Developed a student management system using ASP.NET Core 8, Entity Framework Core, and MVC with a layered architecture, including data access layer, repository, and representation layer.

- Utilized Entity Framework Core's Code First technique to establish the database schema.
- Designed the front end views with HTML, CSS, and Bootstrap, ensuring a responsive and user-friendly interface.
- Implemented authentication and role-based authorization mechanisms using Claims and Cookies to control access to system resources

Todost 🔗
- This application allows users to (Add, Read, Drag Drop, Delete) operations on TodoList.
  The system is built using HTML, CSS, JavaScript, FontAwsome and Local Storage

Court Reservation Management System
- Developed a reservation console application in C# following OOP object-oriented programming principles.
- Featured two main user roles: an admin capable of managing available courts and time slots, and a customer empowered to view and reserve courts from the admin's schedule.

Bookmark 🔗
- *The "Bookmark" saves your favorite links so you can visit them whenever you like, and includes the following features: - Allows you to add, visit, and delete links. - You can reset your list. Responsive for all screens, The system is built using HTML, CSS, JavaScript, FontAwsome and Local Storage*

Admin-Dashboard 🔗
- Responsive admin dashboard page using react js, bootstrap 5, JSON server , React Graphs and Charts (eChart, APEXCHARTS) , Animated Side Menu and Navigation , Data Fetching from mock api , Dynamic Data Mapping.

Weather App 🔗
- *Smart Search Bar: Easily find weather information for any city. -Auto-Location, The system is built using HTML, CSS, ,JavaScript, Bootstrap*

LANGUAGES

Arabic: Native   English: Excellent

EXTRA REGULAR ACTIVITIES:

- Head of OC for SuperFany (Student Activity).
- Vice of HR committee for Faculty of Arts Student Union.
- Head of Families committee at Faculty of Arts student union
